1. Claims 5 and 7-11 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is US Patent No. 6000832 to Franklin et al.

Franklin et al. teach a customer generating a message authentication code (MAC) as a function of a private key and sending the MAC to a merchant. Once the MAC is received, the merchant sends an authorization request to the bank for verification of the MAC, private key and other data. Franklin et al. taken either individual or in combination with other prior art of record fails to teach or suggest computer forwarding said authorization request message over said payment network to said check site for computer verification of the authenticity of said message authentication code, wherein said authorization request message includes an expiration date field and said message authentication code is placed in said expiration date field as recited in independent claim 5; computer generating a second message authentication code using said ETSN and said per-card key, converting said second message authentication code into a pseudo expiration date using said reference data and generating an authorization request having an expiration date field containing said pseudo expiration date as recited in independent claim 7. Additionally, modifying Franklin et al. to include these features would destroy the operation of the reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
